

# COMMINGLED CONTAINERS

## *A NRRA Cooperative Recycling Program*

Oftentimes recycling programs find collecting commingled (mixed) containers for recycling both efficient and cost-effective. Once these materials are collected, they are transported to a Material Recovery Facility (also known as a "MRF") where they are separated and processed before being sent to a re-manufacturing facility. Collecting commingled recyclables is easy and convenient for both the resident (since all containers go into one bin) and also for recycling attendants (since no time is spent baling and storing the containers).

## PROGRAM DETAILS

- ♻️ Contact NRRA at (603) 736-4401 to sign up for the commingled container recycling program and receive current pricing information
- ♻️ Choose how the commingled containers will be collected and stored. (i.e., in a bunker or roll-off container)
- ♻️ Contact NRRA to coordinate pick up or delivery of the commingled containers to or from a vendor

### Acceptable Materials
